How Collections Teams Can Navigate Compliance without Sacrificing Performance

Collections have never been more complex

Riding years of economic tumult, collections teams are grappling with market trends that amplify the existing challenge of performing their work

US consumer loan delinquencies are surging to a 13-year high in 2023

Inflation is high - and the average household is carrying \$15k in debt

Banks and collections teams are projecting - and prepping for a record year ahead

Three forces impacting the collections industry

SCOMA

A tangled web of federal, state, and municipal requirements can lead to costly mistakes.

Compliance is vital.

External factors are impacting the way that collections contact centers operate – and deliver value and secure promises to pay (PTP)

大文文文 HIGH TURNOVER

The Consumer Financial Protection Bureau receives more complaints about collection agencies than any other business, product, or service

Emotional intelligence is needed.

90% of contact centers plan to grow despite attrition rates as high as 70%

Training is key.

Four strategies for contact centers to thrive through generative Al

The future of compliance success in the contact center lies in the adoption of generative AI technology.

By empowering contact center agents with modern Al solutions, collections teams can:

Monitor conversations in real time to identify anomalies and risks early

Trigger compliance alertsCheck every call

Minimize barriers on the road to ramp up

- Behavioral coaching customized for each agent
- On-the-call support with guided workflows

Provide checklists, guided workflows, and hints

- Removing the margin for human error
- ✓ Data-driven decision making

Empower agents to maximize their potential

 Real-time support
Automating ACW and other rote tasks

Why revenue-generating collection teams choose Cresta
